Pat. Name	Hasan Shafeek Ibrahim Waked	Gender	Female
File No.	2113021/6	Age	44 Year
Admission Date	06-01-2022 10:42	Pat. Type	In Patient
Referring Doctor	Razan Yousef kamal Odeh	Exam Date	06-01-2022
Report Date	08-01-2022		

Cervical MRI with I.V نصف الاجراء

#### Report :

Known case of metastatic breast cancer.

Heterogeneous bone marrow signal intensity with abnormal enhancement post contrast administration. Findings are concerning for metastatic process.

Decreased C7 vertebral body height with mild wedging with minimal bone marrow edema is noted

No radiological evidence of cord compression.

C4-C5: diffuse disc bulge with central disc protrusion, compressing the subarachnoid space, not causing significant central canal or neural foramina stenosis.

Multiple enlarged cervical lymph nodes.

Dr. Mosab Saleh Tayeb Maree
